

## Kerr Environmental Services Corp.

*Sustainable Ecological Restoration  
and Environmental Consulting*

### **Wetland Delineation and USACE Confirmation - NASO Dam Neck Annex (+/- 1,210 Acres) Naval Air Station Oceana, Virginia Beach, Virginia**

Kerr Environmental Services served as the local expert regarding coastal plain wetland delineations and local regulatory requirements for a wetland delineation on behalf of NAVFAC for Naval Air Station Oceana Dam Neck Annex in Virginia Beach, Virginia (+/- 1,210 Acres). Kerr Environmental Services provided local knowledge on soils, plants, hydrology and local regulatory requirements to perform the wetland flagging during the base-wide delineation of jurisdictional wetlands and Waters of the United States.

The wetland delineation was completed according to the procedures contained in the U.S Army Corps of Engineers *Wetlands Delineation Manual* (1987), the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region* (2010) and relevant supplemental guidance. Kerr Environmental Services collected the required data to complete the USACE wetland determination data forms, including field classification of soils for hydric field indicators, observations of wetland hydrology and inventories of vegetation on-site for a predominance of hydrophytic vegetation. Kerr Environmental Services assisted in preparing the Jurisdictional Determination data package and securing confirmation of the wetland delineation from the U.S Army Corps of Engineers.
