

Kerr Environmental Services Corp.

sustainable ecological restoration and environmental consulting

NEPA DOCUMENTATION STUDIES

Witchduck Road Phase II, City of Virginia Beach, Virginia

Kerr Environmental Services is currently serving as the environmental services sub-consultant responsible for the completion of the Categorical Exclusion document as required by the National Environmental Policy Act (NEPA). The proposed project plans entail widening an approximately 0.5 mile portion of Witchduck Road located in Virginia Beach, Virginia. Kerr Environmental Services was responsible for performing

the following tasks: Phase I ESA of the 32 commercial and institutional properties along the corridor (Phase II ESA sampling and testing recommendations and cost estimates included and pending authorization to proceed), wetland delineation with U.S. Army Corps of Engineers confirmation, management of historic properties, air and noise investigations and integration of those findings into the NEPA document, participation in Citizen Information Meetings, and coordination with local government and state and federal agencies.
