REGULATORY PERMITTING

Stihl Expansion and MG MiniGears Permitting, Virginia Beach Development Authority, Virginia Beach, Virginia

Kerr Environmental Services was responsible for the regulatory negotiations and alternatives analysis to secure a permit to fill 10.4 acres of forested wetlands for the 362,000 square foot Stihl Finished Goods Warehouse and Office Center (19.5 acres) as well as the 90,000 square foot MG MiniGears warehouse facility on 14 acres. Permits were secured on an extremely tight schedule to allow this fast track project to break ground on schedule.
