

WETLAND MITIGATION & BANKING EXPERIENCE

Cypress Springs Wetland Mitigation Bank, Charles City County, Virginia

Kerr Environmental Services provided the environmental services and managed all geotechnical, surveying and engineering for the development of the wetland mitigation banking agreement and design and planting plans for this 250 acre mitigation bank located on the banks of the Chickahominy River, servicing the James River watershed. The bank has met all success criteria, has sold all credits and is in the process of securing regulatory documentation for successful closure of the bank.
